

Pervasive Healthcare: what about the next steps?

Opinions and suggestions from PerHealth attendees.

Pervasive Healthcare ...

- Do you think the current research approach and methodologies are able to solve open issues of Pervasive Healthcare? How can they be improved?

- Are current technologies mature to support a complete system for pervasive and personalized healthcare? If not, which requirements should be addressed?

- How can we effectively involve interdisciplinary teams to work on this area? (Not only physicians and not only ICT people!) Any specific disciplines that you feel we need to specially involve?

What do you think about PerHealth 2010?

- Did the call for papers cover all the interesting topics on Pervasive Healthcare? If not, what is missing?

- What do you think about the quality of the Technical Program?

- In your opinion, is it important to have a dedicated event on this theme?

- What do you think of establishing a multi-disciplinary research community on Pervasive Healthcare? Would you join it?

- Are you interested in participating in the organization of the next edition of this workshop, PerHealth 2011? Specify the role you would like to cover (e.g., TPC Member, Program Chair, Publicity Chair) and your email address.
